

Low Profile LED

Magnetic Mount

Hazard Systems are proud to release a new magnetic mount LED Lightbar. It is a compact and versatile high intensity Lightbar and has all the functionality (excluding alley / take down lights) of our larger LED Lightbars. Major benefits of this LED Lightbar are its size (400mm x 210mm x 110mm) and the vacuum magnetic mount system, which is rated to 112kph. Other benefits include low current draw, long and maintenance free service life, reliable solid-state electronics and extremely low electromagnetic emissions.

This is a high quality cost effective Lightbar.

HEAD CONFIGURATIONS:

Size: 400mm L x 210mm D x 110mm H

TECHNICAL SPECIFICATIONS:

- Configurations: The Lightbar is available as a 4 head corner, 4 head in-line, 6 head (4 corner, one forward and one rear facing LED modules) and 8 head (4 corner, 2 forward and 2 rear facing LED modules) as pictured.
- Voltage: The Lightbars are voltage specific and as such are available in 12 or 24 volt
- Voltage Rating: 12V: 9-16V 24V: 18-30V
- Current Draw: Very low current consumption due to high power 1 watt lumileds.
- 12 Volt: Average 0.2amp per head 24 Volt: Average 0.1amp per head.
- Mounting: Permanent mount or vacuum magnet mount (with cigarette plug).
- Colours: Available in various colours configurations including red/blue interspersed.
- Flash patterns: The Lightbars come pre-programmed with three flash patterns (these are selectable by opening the Lightbar).
- Permanent Mount Lightbars can be synchronized to other Hazard products.
